

A technical drawing of a valve assembly is shown in white lines on a dark blue background. The drawing includes a top view of a valve body with a central stem and a cross-shaped mark, and a side view of the valve body with a flange and a central stem. The drawing is centered on the page.

# BREMER VALVES

# Our Company

Combining Tradition and Innovation for Over 75 Years

**Bremer Valves** was founded in 1947 near Milan by Gianni and Renzo Merlini to manufacture high-tech products. In the 1960s, it shifted focus to the **innovative ball valve**. As demand grew, the company decided to specialize exclusively in ball valves, continuously updating its products with the latest materials and construction methods.

In 1990, Bremer conducted its **first cryogenic test**, leading to a rise in cryogenic valve production. Today, there are in-house facilities dedicated to cryogenic testing.

## Customization

Bremer Valves works closely with its clients to design and manufacture tailor-made valves that address specific technical and operational requirements.

## Innovation

The company is driving innovation in emerging sectors such as LNG (Liquefied Natural Gas) and hydrogen.

## Ethics

Integrity, transparency and respect are the foundation of every action and decision taken within the company.

# Certifications & tests

Bremer Valves manufactures and assembles exclusively in **Northern Italy** following **high quality standards** according to main international criteria and codes.

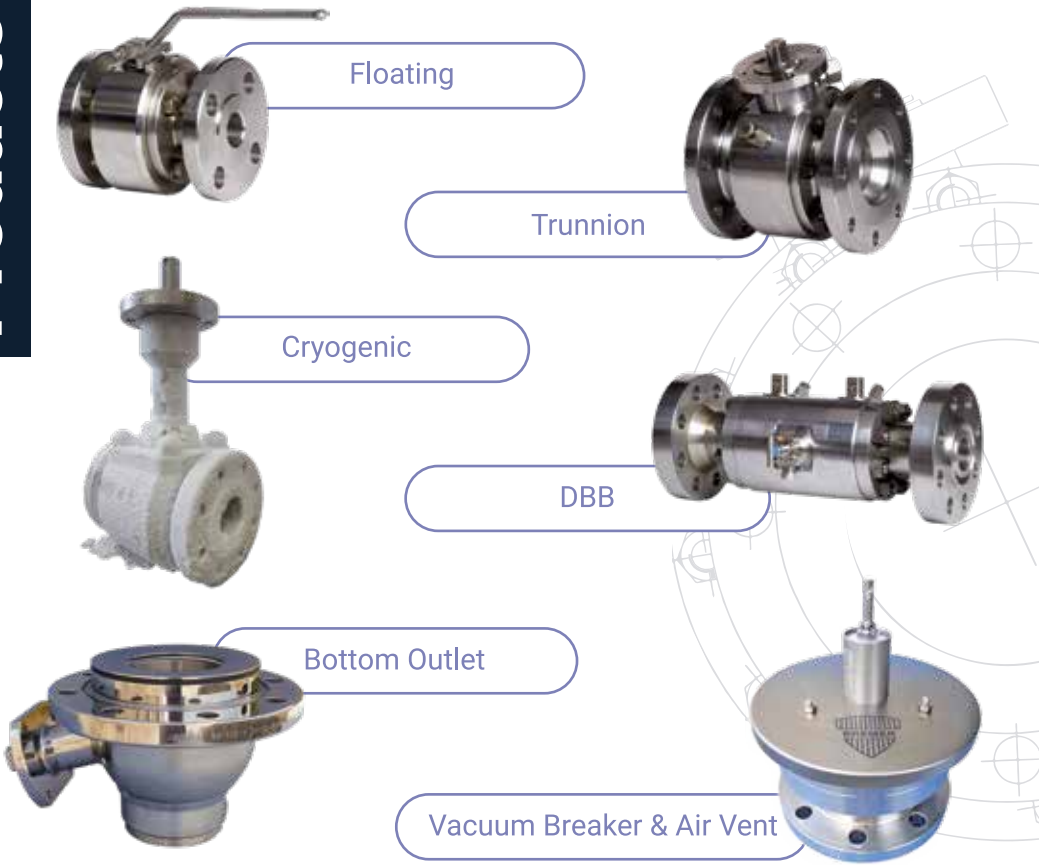

Bremer is certified for Ball Valves - License 6D-1312

API-6D

Tests and certificates according to API598, BS6755 part I or DIN3230.

- High Temperature
- Low Temperature
- Vacuum Test
- Cycle
- Nitrogen High Pressure Gas
- Fugitive Emission with Helium
- Dye Penetrant
- Magnetic Particles Test PMI
- Ultrasonic
- RX

# Products

# Markets

Bremer Valves serves a wide range of industries across the globe, providing high-quality valves designed for diverse applications and market needs.

- Oil & Gas
- Gas Storage & Cryo Service
- Off Shore Plants
- Power Plant & Wind Farm
- Hydrogen
- Chemical & Petrochemical

Quality is our priority

## Sustainability

As a **trusted partner** for industries across the globe, Bremer strives to **deliver value** not only to its clients but also to its stakeholders, suppliers, and employees. **Sustainability** is the compass of its efforts.

Bremer continuously harnesses engineering expertise to **drive the energy transition and support sustainable technologies**. It strives to minimize waste, reduce energy consumption, and strictly adhere to environmental regulations. **Employees** are the cornerstone of Bremer's success. Investments are focused on their **growth and well-being**: a supportive learning culture, the promotion of gender equality, and an inclusive work environment.

**30%**

Energy used from renewable sources

**80%**

Renewable waste production

# Global Presence

Bremer Valves is proud to have established a strong global footprint, delivering high-quality industrial valves to customers around the world.
